Subject: Scioto Ridge United Methodist Church in Columbus, OH
Truss Fabrication and Delivery

Dear Mr. Lutgens:

Corna/Kokosing Construction Company is committed to providing a safe working environment for all of our associates and trade contractors. Secondly, Corna/Kokosing strives to complete each and every project on time and to the highest degree of quality possible.

Your work on the shop drawings along with the fabrication of the light gauge trusses on Scioto Ridge United Methodist Church was commendable. To date in my career, this is my first experience of a truss job that was not plagued by problems with the shop drawings and fabrication. It has been a pleasure working with you and your company. You were not afraid to take on challenges related to schedule and also engineering in order to complete this aspect of the project. I feel given the complexity of the task, Tri-State has performed above our expectations.

Again, thank you for your hard work on this aspect of the project. I look forward to the ongoing relationship with you and Tri-State on this project and on others in the future.

Sincerely,

Jim Valentas
Project Engineer
