Attn: Stu Melvin  
Re: Bishop Fenwick High School

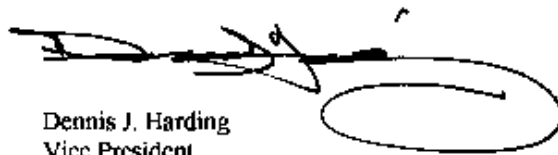

Dear Stu,

I wanted to thank you, Steve, Greg, Ed, Troy and everyone with your firm involved in making Bishop Fenwick High School the successful project it turned out to be. We couldn't have done it without you.

The Light Gauge Metal Trusses manufactured and furnished by Tri-State CFS were a large portion of the overall project and were excellent from engineering through assembly to delivery. Unfortunately the architect and engineer left a lot to the imagination, lacking details, truss profiles, etc. yet Tri-State was able to overcome the obstacles, manufacture some trusses shown as structural steel and help the owner to meet their budget and maintain loads and safety factors required. Tri-State manufactures the highest quality roof Truss in the industry today, saving contractors and owners numerous labor hours assisting in meeting our productivity and keeping the project on schedule.

I have personally enjoyed the relationship with everyone at Tri-State, you have assembled the "dream team" of the metal truss industry. Keep up the good work and competitive pricing. I hope to be able to do business with all of you for years to come.

Sincerely,  
Wal-Tron, Inc.
